| <p>I got a Ticket, about a Problem in one of my projects. If a customer uses HTML-Tags in a textarea and he writes the begin of a html-comment &lt;!-- in the following the rest of the page is not longer to use because some browser imlicit closes the textarea. But also the Text-Output of the Site iss corrupted. In the yellow report-area (also as i was using the Comment-Start-Tag in the subversion comment) i discovered the same output-error.</p> |        |                          |               |
