Redmine - Defect #11603

log file rotation is broken: undefined method `log_path' for #<Rails::Application::Configuration:0xb60966d4>

2012-08-08 17:46 - Niels Boeger

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Documentation		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	2.0.3

Description

We enabled the log file rotation by changing *config/additional_environment.rb* like this:

```
#Logger.new(PATH,NUM_FILES_TO_ROTATE,FILE_SIZE)
config.logger = Logger.new(config.log_path, 7, 1000000)
config.logger.level = Logger::INFO
```

After a restart of Redmine, we get this error message: *undefined method `log_path' for #<Rails::Application::Configuration:0xb60966d4>*
Please see attached screenshot for details.

Enviroment:

- Redmine (2.0-stable, rev. 10171)
- Passenger/Phusion (latest) and nginx (1.2.2)
- Ubuntu 10.04
- MySQL

History

#1 - 2012-08-08 18:23 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Invalid

Sorry, no technical support here. This is a Rails configuration issue.

#2 - 2012-10-05 14:49 - Jonas Pasche

- Status changed from Closed to Reopened

Maybe you're right, however the two lines of non-functioning code are directly [copied from the official Redmine installation documentation](#) - so even if it's not a Redmine error, it's at least a Redmine documentation error.

#3 - 2012-10-05 18:25 - Jean-Philippe Lang

- Category set to Documentation

- Status changed from Reopened to Closed

- Resolution changed from Invalid to Fixed

Documentation fixed. Rails' config.log_path is no longer available, you have to explicitly set the path to your logfile. Eg:

```
config.logger = Logger.new('/path/to/redmine/log/production.log', 7, 1000000)
```
