<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	1.4.4
<b>Resolution:</b>	Invalid		
<b>Description</b>			
<p>I posted defect Defect <a href="#">#11601</a> early.</p> <p>I installed Redmine 1.4.4 on Debian Wheezy from this instruction STEP BY STEP: <a href="http://www.redmine.org/projects/redmine/wiki/HowTo_Install_Redmine_on_Debian_Wheezy_Testing_with_MySQL_and_Apache2-Passenger">http://www.redmine.org/projects/redmine/wiki/HowTo_Install_Redmine_on_Debian_Wheezy_Testing_with_MySQL_and_Apache2-Passenger</a></p> <p>After successful install. I have a problem with JS.</p> <p>Jean-Philippe: Its a web server configuration issue. I get 403 responses when requesting javascripts (eg. <a href="http://home.kradllit.com/redmine/javascripts/prototype.js">http://home.kradllit.com/redmine/javascripts/prototype.js</a>)</p> <p>But the really problem is the files controls.js, dragdrop.js, effects.js, prototype.js doesn't exist.</p> <p>I am attached screenshot where compare files in BitNami Redmine (Rightside) and Debian package install (leftside).</p>			

History

#1 - 2012-08-09 23:23 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

I'm really sorry but these files are actually present in the redmine repository and in official release tarballs. I can't fix it in no way as I do not maintain debian packages.
