<b>Description</b>  Hi guys, I am new comer of Redmine and I am now looking for the source code of Requmngt as I would like to use Redmine to manage the requirements, however, the file stored in following link <a href="https://www.isotrol.com/projects/list_files/org00006-requmngt">https://www.isotrol.com/projects/list_files/org00006-requmngt</a> is invalid or expired and could anyone provide me the source code and show me where I can get it, or if Requmngt is not right option, do we have any other options/plugins that can support this my need? Thanks in advance.  Cheers, Kelvin

Sorry no plugin request here, only Redmine core issues.
