Description

This issue affects Redmine **1.4.3** and current **2.0.x trunk**. It is related to table formatting where tables have merged cells. When the cells are regular ones, the formatting is ok. The problem arises when merging cells in title rows. The example below shows the defect.

This

```
|_. Position |_. Setting |\2_. Measured |
|= A |= 1000 |= 1050 |= 950 |
```

produces

Position	Setting	\2_. Measured	
A	1000	1050	

and this

```
|_. Position |_. Setting |\2=. Measured |
|= A |= 1000 |= 1050 |= 950 |
```

produces

Position	Setting	Measured	
A	1000	1050	950
