

Redmine - Defect #11680

after repository config mistake repository tab is no more visible in project settings

2012-08-22 12:27 - Roberto Martelloni

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.0.3
Resolution:	Invalid		
Description			
I've some problem installing git as scm.			
After playing around trying to use redmin + git, the repository tab in project -> settings -> repository is no more visible.			
I've the "repository" module enabled.			
Also in any new project created the tab is no more visible.			
someone can help ? to dig more ? I'm a newbie bot in ruby and in redmine.			

History

#1 - 2012-08-22 13:05 - Toshi MARUYAMA

- Status changed from New to Closed
- Resolution set to Invalid

Add "Options -MultiViews" to your apache conf.

```
<Directory /somewhere>
    # MultiViews must be turned off
    Options -MultiViews
</Directory>
```

#2 - 2012-08-22 14:05 - Roberto Martelloni

- Status changed from Closed to Reopened

Already in -MultiViews

```
&lt;Directory "/opt/redmine-2.0/public"&gt;
    Options Indexes ExecCGI FollowSymLinks
    Options -MultiViews
    AllowOverride All

Order allow,deny

&lt;/Directory&gt;
```

yes:

redmine_lightbox
redmine_milestones
redmine_theme_changer

let me know if you need more info, I can dig more with your support, as I say, I'm a newbie in ruby and redmine.

I've the "repository" module enabled.

In project settings "Modules" tab or/and in the "Default enabled modules for new projects" list of the Administration/Settings/Projects tab?

sorry:
rake redmine:plugins:migrate RAILS_ENV=production

#10 - 2012-08-22 17:55 - Roberto Martelloni

found the problem, sorry ppl.
