<b>Category:</b>	Issues	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	2.0.3
<b>Resolution:</b>	Invalid		
<b>Description</b> I just installed redmine on my server. Below are the details.  Environment: Redmine version                2.0.3.stable Ruby version                   1.9.3 (i386-mingw32) Rails version                  3.2.6 Environment                   production Database adapter                SQLite Redmine plugins: no plugin installed  But when i click on the New Issue on top, page not found error message is displayed.			

#### History

##### #1 - 2012-08-24 17:08 - Etienne Massip

Looks like a server issue, not an application issue.

What's in your server and application logs?

##### #2 - 2012-08-24 17:47 - Mujeeb Farooqi

I configured this on windows.

IIS is installed and some website are there.  
But i created a new website and using port 8082.

windows application log doesn't contain any information related to this.  
I'm using port with the server name like <http://101.x.x.x:8082/>. Is this happening becuz of this?

Mujeeb.

##### #3 - 2012-08-24 18:08 - Mujeeb Farooqi

- Status changed from New to Resolved

This issue is resolved.

I guess the error was coming becuz i didn't added any Trakers and Status in Administration.  
After adding these, new issue page started working.

Thanks anyways.  
Mujeeb.

#4 - 2012-08-24 22:12 - Etienne Massip

- Status changed from Resolved to Closed
- Resolution set to Invalid
