Description

Adding a user to multiple projects in the administration is only done per project. I'd like to see a UI to easily add a user to multiple projects (or all) at the same time.

It's really not efficient if you have to add a user to 40-50 projects and have to do it one by one.

Sorry for the "big font" paragraph, I hit h1 by accident and can't seem to edit it now :(. I'd be happy if someone with the necessary privileges to remove the h1.

+ 1 yeah a list where you can select or select multiple project
While this feature is not planned yet, you may solve your problem using Groups. You can create a group and assign it to any number of projects. Then you'll need only to assign new user to corresponding group and it would be added to all that projects.

You can create a group and assign it to any number of projects.

This will solve only at half, you still need to go through all projects to add selected group to them.

This is must have feature in Administration - Users - Some_User - Projects Tab - Add button "Add to all/active projects"

I think with Groups, it would be nice to have a multi-select dropdown for projects. I am using Redmine 2.2 for the time being, but I am pretty sure this is still in the most recent version (can't check on demo without admin credentials).

+1, it would be great if we get the multi-select dropdown for projects for both user and group level.

The UI for adding projects to a user or group is changed by r13499, you can now select multiple projects:

Just need to add a "Check all" button so we can add a user/group to all projects in a few clicks.

- Target version set to 3.0.0
- File add_projects.png added

The UI for adding projects to a user or group is changed by r13499, you can now select multiple projects:

add_projects.png

Just need to add a "Check all" button so we can add a user/group to all projects in a few clicks.

- Status changed from New to Closed
- Resolution set to Fixed

- Subject changed from Add user to multiple projects to Add user/group to multiple projects at once

- Duplicated by Feature #9773: Add Group to Multiple Projects added
Hi,

In companies with a lot of projects this is not very usable as-is, can we thing to add a filter ?
By name or by project and its sub-project.
