Resolution:	Duplicate		

Description

Links

Using **Long Text** and **Text** as a type of field it is impossible to add an active link — Now it will be displayed as a plain text.

It will be great to add the type **Link** for links

Now	http://com.com
Will be great to display	http://com.com

Links templates

Sometimes it is helpful to fill custom field with ID.

This ID should be searchable, but it can be a link — so it will be helpful to configure the prefix, e.g

ID (in ticket)	RS0212
Prefix (in custom field settings)	http://somedomain.home/?id%?type
Link (in result)	http://somedomain.home/?id*RS0212*?type
Display as (in ticket)	RS0212

Improvement for Category

It will be great to display category as a link to the search page e.g.

http://www.redmine.org/projects/redmine/issues?set_filter=1&f%5B%5D=category_id&op%5Bcategory_id%5D=%3D&v5Bcategory_id%5D%5B%5D=14&f%5B%5D=&c%5B%5D=tracker&c%5B%5D=status&c%5B%5D=subject&c%5B%5D=updated_on&c%5B%5D=category

History
