Redmine - Defect #11723
redmine:send_reminders notification misses if assignee is a group
2012-08-28 10:08 - Carlos Peñas

Status: Closed
Priority: Low
Assignee: Jean-Philippe Lang
Category: Email notifications
Target version: 2.1.0
Resolution: Fixed

Description

Rake task "redmine:send_reminders" only send notifications for tickets assigned to users, if the ticket is assigned to a group, users in that group don't get notified. It's discussable but IMHO is a must for teamwork.

In addition there's no way to specify a group_id in the rake task.
