## Description

The following just happened:

1. opened project
2. opened list of issues
3. set filter to show all with status "Resolved on Dev"
4. selected all issues, right clicked, batch set "% Done" to 100%
5. list reloaded, but in root, not in project, so all issues of all projects with the given status where listed, of course I didn't realize at the time...
6. selected all again and batch updated status to "Resolved on Test"
7. made some other developers a bit angry and had to restore yesterday's backup of our Redmine system

I have done this procedure before but never noticed this behaviour. Has anybody else noticed it? Is it a configuration problem? Our setup is pretty basic, though...

## We are using:

Environment:
- Redmine version 2.0.3.stable
- Ruby version 1.8.7 (x86_64-linux)
- Rails version 3.2.6
- Environment production
- Database adapter PostgreSQL
Redmine plugins: no plugin installed

## History

**#1 - 2012-08-30 12:17 - Lorenz Breu**

New insight:
Seems that it happens when issues of both a project and a subproject are updated at the same time...

**#2 - 2012-08-30 12:20 - Etienne Massip**

- Status changed from New to Confirmed
- Target version set to Candidate for next minor release

Reproduced on demo.
#3 - 2012-08-30 12:21 - Etienne Massip
- Subject changed from Batch update of issues clears project-filter to Batch update of issues clears project path

#4 - 2012-09-02 17:05 - Jean-Philippe Lang
- Status changed from Confirmed to Closed
- Assignee set to Jean-Philippe Lang
- Target version changed from Candidate for next minor release to 2.1.0
- Resolution set to Fixed

Confirmed with 2.0-stable but fixed in current trunk.
