Resolution:	Invalid	**Affected version:**	1.3.2

Description

Hi,

I follow the HowTo http://www.redmine.org/projects/redmine/wiki/Redmine_on_CentOS_installation_HOWTO.
I use a CentOS 6.3 with MySQL and apache (last version)

During installation HowTo, I did the command on terminal :
RAILS_ENV=production bundle exec rake generate_session_store

Result :
/usr/local/lib/ruby/gems/1.8/gems/bundler-1.1.5/lib/bundler/rubygems_integration.rb:223:in `bin_path': can't find executable rake
(Gem::Exception) from /usr/local/bin/rake:19

Use rake version 0.8.3 in bundle.

Do you have any solutions?

Thx u.
