Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
mails are sent arbitrarily when I set delivery_method in configuration.yml to :async_smtp. I am using the gmail smtp server.			
Im using: redmine 2.0.3 ruby 1.8.7 rails 3.2.6			
My configuration.yml file:			
default: scm_git_command: /usr/bin/git email_delivery: delivery_method: :smtp smtp_settings: enable_starttls_auto: true port: "587" address: "smtp.gmail.com" domain: "smtp.gmail.com" authentication: :plain user_name: "....." password: "....."			

History

#1 - 2012-08-30 22:35 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid

Use async_smtp_settings instead of smtp_settings.
