Description			
<p>hi all</p> <p>i am very new to redmine, just now we started to deploy,but we are lack in one features, we are using redmine for issue tracking, we have 10000 different user,if i set "view issue", all the issues visible to customer but i want only own issue visible to the respective customer.i want to restrict to see others issue.</p> <p>last week we recommended redmine to our company, now we stuck on this.</p> <p>please help us.</p>
