Description

You can't override mailer views as you can other views from within a redmine plugin.

I suspect the cause of the problem is inside /lib/redmine/plugin.rb line 83:-
http://www.redmine.org/projects/redmine/repository/entry/trunk/lib/redmine/plugin.rb

```
    if File.directory?(view_path)
      ActionController::Base.prepend_view_path(view_path)
    end
```

Should be:-

```
    if File.directory?(view_path)
      ActionController::Base.prepend_view_path(view_path)
      ActionMailer::Base.prepend_view_path(view_path)
    end
```

Because otherwise, as ActionMailer and ActionController inherit from the same class (AbstractController), any extra view path given to the ActionController won't be available to the ActionMailer.

Redmine version: 2.0.3.stable.10173 but it seems to have not been fixed yet in trunk too.
