**Description**

When copying a ticket only the ticket itself is copied, sub tickets are missing.

This used to work fine with 1.x release but seems to be broken with 2.x

Actually we have version 2.0.3 running.

*- Status changed from New to Closed*

*- Resolution set to Duplicate*

AFAIK, this was not implemented so it does not used to work with 1.x.
Closing as duplicate of #6965.

#6965 indeed duplicates this.

But I can confirm it worked with 1.x without additional plugin.

Honestly, I consider this rather as a major bug than a plugin candidate.
