

Redmine - Patch #11847

Autologin if have back_url

2012-09-17 07:20 - Serg Fedosov

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	90%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:			
Description Example, when user run browser with a lot of old tabs of redmine, he see in each 'login form'. He fills one of them falls into a redmine. When it updates the other tab, where the url like a 'login?back_url=' is triggered to autologout. But he wanted to go to . I'm fix this. If user logged and have back_url he will be redirect to as he wants
