Resolution:			
Description Developing Redmine 2.1.0 in my network with Sub-URI - "example.com/redmine". Entire site is working flawlessly until i got next error while tried to edit/delete issue category under project. After i'm trying to delete/edit category browser shows "404 not found", while trying to open URL "http://192.168.0.110/issue_categories/1/edit" and not something like "http://192.168.0.110/ redmine /issue_categories/1/edit" Not Found The requested URL /issue_categories/1/edit was not found on this server. httpd/error_log [Wed Sep 19 21:07:11 2012] [error] [client 192.168.0.198] File does not exist: /var/www/html/issue_categories, referer: http://192.168.0.110/redmine/projects/daily/settings [Wed Sep 19 21:07:11 2012] [error] [client 192.168.0.198] File does not exist: /var/www/html/favicon.ico redmine/production_log showing nothing. Didn't counter any other problem by that time.
