

Redmine - Feature #11913

Add batch field selector for both columns and rows in workflows/edit/Fields permissions

2012-09-24 10:17 - Александр Закревский

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Permissions and roles	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description It would be convenient, if an admin could set similar permissions for the whole row (set the permission for the field for all task statuses) and whole column (set the permission for the task status for all fields). For now it's a good feature demanding too much handwork to set up.			

History

#1 - 2020-08-23 06:39 - Go MAEDA

- Status changed from New to Closed
- Resolution set to Invalid

- You can check/uncheck checkboxes by row or column by clicking "☐" mark in row/column header
- In "Fields permissions" tab, you can copy the value to all cells on the right side by clicking "»" mark
