undefined method `destroy' for nil:NilClass			
# {RAILS_ROOT}/app/controllers/projects_controller.rb:123:in `edit'			
Expected result:			
The project is edited successfully.			

#### Associated revisions

##### Revision 320 - 2007-03-09 21:03 - Jean-Philippe Lang

modified textilizable helper method:

- no more eval statement
- r12 in text will be turned into a link to the revision 12 in the repository
- #12 in text will be turned into a link to the issue 12

#### History

##### #1 - 2007-03-12 12:02 - Jonathan Dance

Err, this was actually tested against revision 330 (which is the current head revision).

##### #2 - 2007-03-12 12:05 - Jonathan Dance

Okay, I am a liar, this doesn't happen with all projects (I should try my own steps). It only happens when editing a project when that project has a sub-project.

##### #3 - 2007-03-12 12:07 - Jonathan Dance

It also occurs when editing the sub-project... sorry for the spam.

##### #4 - 2007-03-12 12:16 - Jonathan Dance

Wow, okay... the real problem was you couldn't edit a project

unless it had a  
wiki. See patch.

#5 - 2007-03-12 13:34 - Jean-Philippe Lang

I've committed the fix.  
Thanks for your help.
