

Redmine - Feature #12022

Change/Update author when an issue is re-opened to the person who re-opens

2012-10-04 18:45 - Brian Lindahl

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	90%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:			
Resolution:	Wont fix		
Description This improvement could be guarded with a new Project setting. Add the following code to app/models/issue.rb: <pre>def update_author_when_reopened if reopened? self.author = User.current end end</pre> Add a call to it for before_save: <pre>- before_save :close_duplicates, :update_author_when_reopened, :update_done_ratio_from_issue_status, :force_updated_on_change + before_save :close_duplicates, :update_author_when_reopened, :update_done_ratio_from_issue_status, :force_updated_on_change</pre>

Er...

Add a call to it for before_save:

```
- before_save :close_duplicates, :update_done_ratio_from_issue_status, :force_updated_on_change
+ before_save :close_duplicates, :update_author_when_reopened, :update_done_ratio_from_issue_status, :force_updated_on_change
```

#2 - 2012-10-20 09:57 - Anonymous

Wouldn't this destroy the record of the original author...?

#3 - 2021-06-10 03:37 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

I can't think of use cases for the feature. And I believe that the behavior is confusing and undesirable for most users.

However, if the [#1739](#) is implemented in the future, I think what you want to do can be achieved manually.
