Resolution:	Invalid	**Affected version:**	

Description

Hi guys,

Very new to RedMine, an in no way a Ruby/RoR dev, so I could be mistaken here.

Fired up a new Ubuntu 12.04 53 VM for a fresh installation.

I followed the <u>excellent guide here</u> (so will just rehash my post there).

When I get to this point:

```
$ sudo RAILS_ENV=production rake db:migrate
```

I get hit up with this error:

```
Please install the mysql2 adapter: `gem install activerecord-mysql2-adapter` (mysql2 is not part o
f the bundle. Add it to Gemfile.)
Tasks: TOP => db:migrate => environment
(See full trace by running task with -trace)
```

I'm following this up with:

```
$ sudo gem install activerecord-mysql2-adapter mysql2
Successfully installed activerecord-mysql2-adapter-0.0.3
Building native extensions. This could take a while…
Successfully installed mysql2-0.3.11
2 gems installed
Installing ri documentation for activerecord-mysql2-adapter-0.0.3…
Installing ri documentation for mysql2-0.3.11…
Installing RDoc documentation for activerecord-mysql2-adapter-0.0.3…
Installing RDoc documentation for mysql2-0.3.11…
```

& try running again the initial command, but the problem remains.

I then try to check the [setup] (? sorry – I'm not a ruby dev):

```
$ sudo bundle install | grep -i sql
Using mysql (2.8.1)
```

After a bit of digging, I think I found a bug & a solution to said bug – I can be wrong, but this allowed be to sake a step forther.
In the Gemfile, I searched for references to "mysql" & commented out & replaced (based on the next portion of same file)

```
# gem "mysql"
gem "mysql2", "~> 0.3.11"
```

Ran `sudo bundle update` & then the buggy command again & managed to proceed.

This **could** be some sort of dependency issue or a typo in the Gemfile - i.e. ruby 1.8.x vs 1.9.x - not sure.

History

#1 - 2012-10-06 01:38 - Toshi MARUYAMA

- Tracker changed from Patch to Defect

- Status changed from New to Closed

- Priority changed from High to Low

- % Done changed from 10 to 0

- Resolution set to Invalid

Please ask your questions which depends on OS in forum, the tracker is for bugs and feature requests only.

#2 - 2012-10-09 06:14 - Jakes vdM

Thanks for the update, Toshi
