Description

Hi,

we run an installation of Redmine 1.4.4 under 2 Domains (domain1.tld and domain2.tld). In the Main Settings the Hostname ist set to domain1.tld and this Hostname is putted in the Mails as Link to Ticket Details.

We want that this Link is changed to domain2.tld for a specific Project.

We installed a Plugin [[http://www.redmine.org/plugins/redmine_mailwrapper]] that changes the FROM Address to something@domain2.tld in s apecific Project.

Is this possible or can we change that Link directly in Sendmail?
