<b>Description</b>			
New installation on Ubuntu 12.04 LTS 64-bit - current stable all-round			
Environment:			
Redmine version 2.1.2.stable			
Ruby version 1.8.7 (x86_64-linux)			
Rails version 3.2.8			
Environment production			
Database adapter Mysql2			
Redmine plugins:			
no plugin installed			
Created new Enumerations for Activities (time tracking), OK, but when I try to reorder any items I get a 404 ( <a href="https://jobs/enumerations/10?enumeration%5Bmove_to%5D=highest">https://jobs/enumerations/10?enumeration%5Bmove_to%5D=highest</a> ):			
The page you were trying to access doesn't exist or has been removed.			
Think that's all information required - please let me know if anything else is needed			

#### History

##### #1 - 2012-10-09 19:12 - Jean-Philippe Lang

- Resolution set to Cant reproduce

Works fine for me:

```
[19:11:56,751] POST http://localhost:3000/enumerations/9?enumeration%5Bmove_to%5D=highest [HTTP/1.1 302 Found 156ms]
```

Thanks for looking into this.

I'm new to RedMine & have little to no experience/knowledge with Ruby/RoR.  
How can I go about debugging this issue & providing additional information?

##### #3 - 2012-10-09 20:27 - Jakes vdM

- Status changed from New to Resolved

UPDATE: hmmm :/ seems OK now from a different client machine - nothing has changed server-side overnight.  
I'll tentatively mark this closed & revisit the issue if it crops up again.

Thanks for the help

##### #4 - 2012-10-09 21:29 - Jean-Philippe Lang

Make sure that javascript is enabled, it won't work if it's not.

##### #5 - 2012-10-10 09:26 - Etienne Massip

- Status changed from Resolved to Closed

- Resolution changed from Cant reproduce to Invalid
