

Redmine - Defect #12082

Proxy error on Windows 7 starting Redmine with Apache

2012-10-12 04:43 - Hanyi Zhu

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		

Description

When I tried to start Redmine via the website displayed I got a proxy error message(with Apache):

Proxy Error
The proxy server received an invalid response from an upstream server.
The proxy server could not handle the request GET /redmine/.

I have installed redmine with this site
[[http://www.redmine.org/projects/redmine/wiki/HowTo_Install_Redmine_in_a_sub-URI_on_Windows_with_Apache]]
and the version of gems:
ruby 1.8.7
rails 3.2.8
redmine 2.1.2
win32-service 0.7.2
mongrel_service 0.4.0

the redmine works fine with webrick but I want it to work with Apache!
Do you have any idea of this problem?
Any help will be much appreciated!
Attachment is mongrel log
