

Redmine - Feature #12085

New user name format: firstname + first letter of lastname

2012-10-12 10:26 - Anton Nepomnyaschih

Target version: 2.2.0	
Resolution: Fixed	
Description	
<p>Now, when you are displaying column with usernames in issue list, the column is too wide. Because user firstname + lastname is too long. There are other formats (only firstname/...). And that is cool - users like to be named by firstnames. But! If there are two users with the same firstname, you can't distinguish them!</p> <p>It would be cool to add new username format: user firstname + first letter of his lastname and dot.</p> <p>For example:</p> <ul style="list-style-type: none">- Anton N.- Sam H.- Mark S.
