Category:	Core Plugins	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Invalid	**Affected version:**	2.1.0

Description

I tried to install redmine_x_closed. The procedure given for the installation doesn't work for the version 2.1.0 redmine. After lot of struggles, I managed to install delayed_job and redmine_x_closed. But after that redmine was giving some error. It looks like redmine 2.1.0 is not compatible with the redmine_x_closed plugin.

Please provide if there is any more installations / configuration required to make the auto-close plugin working.

History

#1 - 2012-10-15 11:25 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid
