History

#1 - 2007-10-05 15:37 - Jean-Philippe Lang

Migrate first and restart.

#2 - 2007-10-05 16:33 - Adam Knight

Okay, and that worked when I went from 803's DB to 804.

However, when I copy my 0.5.1 DB to a test DB and then migrate it, the migrate fails when it's adding the enumerate column with a similar error.

```
$ rake db:migrate RAILS_ENV="development" --trace
```

```
(in /Library/WebServer/redmine-test)
```

- Invoke db:migrate (first_time)
- Invoke environment (first_time)
- Execute environment
GLoc v1.1 running in development mode. Strings can be modified at runtime.
- Execute db:migrate

#3 - 2007-10-05 18:38 - Jean-Philippe Lang

You're right.

Migration 72 breaks if ran with code >= [r803](#).

#4 - 2007-10-05 18:55 - Jean-Philippe Lang

Fix committed in [r809](#).

Migration 72 should now run fine.

#5 - 2007-10-05 19:24 - Adam Knight

Yep, works.
