Redmine - Feature #12119

Add a "View as ..." feature for administrator to make workflow testing easier

Description

It would be great to add a menu that let an administrator display the application as if it had the specified role. For the moment the only way to test the workflow is to create a test user with each role. It will be quicker to have a menu that let switch the role in real time.

Perhaps this issue already exist, I didn't found it but I'm not sure what to search for.
