

Redmine - Defect #12164

Error on updating issue

2012-10-19 16:21 - Ken Ip

Status:	Closed	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	2.0.4
Resolution:	Invalid		
Description			
Ruby 1.9.3-p194 / Redmine 2.0.4 / mysql 5.5 with backlogs and wk_time plugins			
On updating one of the older issue this error crops up.			
<pre>NoMethodError (undefined method `<' for nil:NilClass): app/models/issue.rb:731:in `block in save_issue_with_child_records' app/models/issue.rb:718:in `save_issue_with_child_records' app/controllers/issues_controller.rb:182:in `update'</pre>			
Seems like it happens when trying to run this line:			
<pre>Redmine::Hook.call_hook(:controller_issues_edit_after_save, { :params => params, :issue => self, :time_entry => @time_entry, :journal => @current_journal})</pre>			
Any help would be greatly appreciated!			

History

#1 - 2012-10-19 18:15 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid

Sorry, you should contact the plugin author or post in [Plugins](#) forum, this tracker if for Redmine core only.

#2 - 2012-10-19 20:53 - Ken Ip

I thought this method is in core?

I thought this method is in core?

That's correct (see [source/trunk/app/models/issue.rb@10671#L920](#)), but the error is triggered by a plugin hooking into the :controller_issues_edit_after_save hook according to the given info.

#4 - 2012-10-22 23:28 - Ken Ip

Actually my mistake - this is happening on the line BEFORE, which is

```
if @issue.save
```

. I've also experienced it on create too when calling save. Any idea if this is plugin still? Can't really find where in the before_save that does this..... Appreciated!

#5 - 2012-10-23 10:38 - Etienne Massip

Hard to tell, but looking at [source/tags/2.0.4/app/models/issue.rb#L731](#) (according to the stack trace) where there's no call to < method, yes, it's likely that the plugin is responsible for this error.
