Redmine - Patch #1218

Patch for relative links to icon images in 'public/help/wiki_syntax.html'

2008-05-09 16:30 - Hajime Baba

Target version:	0.7.3			

Description

Hi, forks,

I suppose that relative links to icon images
in 'public/help/wiki_syntax.html'
should be '../images/jstoolbar/bt_strong.png',
not '../../images/jstoolbar/bt_strong.png'.

If Redmine is deployed on such as mongrel or webrick,
there seems to be no problem, because the links traverse
to the root directory so that the absolute paths are converted
to '/images/jstoolbar/bt_strong.png'.

However, the links are broken when I have deployed Redmine
to a sub URI on Phusion Passenger (mod_rails) with Apache
configuration 'RailsBaseURI /redmine'. About this setting, see
http://www.modrails.com/documentation/Users%20guide.html#deploying_to_sub_uri
for more details.

Below is a simple patch. Thank you for your consideration.

Best Regards,
Hajime BABA

Revision 1609 - 2008-06-30 19:35 - Jean-Philippe Lang

Fixes relative paths to images in wiki_syntax.html (#1218).

History

#1 - 2008-06-30 12:52 - Marc Liyanage

I just noted the same issue and would really appreciate the inclusion of this patch in the next version...

#2 - 2008-06-30 19:35 - Jean-Philippe Lang

- *Category changed from Documents to UI*

- *Status changed from New to Closed*

- *Target version set to 0.8*

You're absolutely right.
Patch committed in r1609. Thanks.

#3 - 2008-07-06 14:21 - Jean-Philippe Lang

- *Target version changed from 0.8 to 0.7.3*
