<b>Description</b> Hey there,  I just tried to upload a userdefined profile picture in our intranet-system.  It seems, that Redmine doesn't support this feature. The only way to integrate it, is to define a gravatar account with my business mailadress, which isn't the best way i think.  My other option is to integrate this Plugin: <a href="http://www.redmine.org/plugins/redmine_local_avatars">http://www.redmine.org/plugins/redmine_local_avatars</a>  But this seems fairly outdated. It would be great to have this feature out of the box integrated.  Best regards

Feature [#13536](#) asks for LDAP Avatar, in addition to a Local Avatar.  
  
There is also [Local Avatars Plugin](#) although it too is for Redmine 1.0.
