Description	
<p>Hey there,</p> <p>I just tried to upload a userdefined profile picture in our intranet-system.</p> <p>It seems, that Redmine doesn't support this feature. The only way to integrate it, is to define a gravatar account with my business mailadress, which isn't the best way i think.</p> <p>My other option is to integrate this Plugin: http://www.redmine.org/plugins/redmine_local_avatars</p> <p>But this seems fairly outdated. It would be great to have this feature out of the box integrated.</p> <p>Best regards</p>

History

#1 - 2013-04-19 19:20 - @ go2null

Feature #13536 asks for LDAP Avatar, in addition to a Local Avatar.

There is also [Local Avatars Plugin](#) although it too is for Redmine 1.0.
