Resolution:	Invalid		**Affected version:**	2.1.2

Description

I am currently using Redmine version 2.1.2. The install is on an Ubuntu 10.04 server with Nginx 1.2.4 and Passenger. Everything on the site works really well except for the Atom Feeds. No matter which feed I click on, it redirects me to:

I figured out that the issue is with the change I made in routes to set projects as the root:

```
#root :to => 'welcome#index', :as => 'home'
root :to => 'projects#index', :as => 'home'
```

Is there are way to make this work with projects as the root?

- Status changed from New to Closed

- Resolution set to Invalid

You get this 404 because Rails fails to generate a root to welcome controller.
Even if you don't want it to be the default, don't comment this route, or any other routes BTW.
