Description

Hi,

the database connection fails, if % is defined inside the password. Maybe this isn't automatically escaped?

Best regards,
Daniel

Revision 10729 - 2012-10-27 10:50 - Jean-Philippe Lang

Adds double quotes in mysql configuration example (#12229).

History

#1 - 2012-10-27 09:15 - Jean-Philippe Lang

Do you use double quotes to wrap your password in database.yml?

#2 - 2012-10-27 10:41 - Daniel Felix

No i used the example config and changed the password.

For Example:
production:
password: test%test /* fails */

production:
password: testtest /* works */

Maybe those do quotes should be added in the example, like in the postgres example.

#3 - 2012-10-27 10:50 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

Yes, that should work with double quotes:

```
password: "test%test"
```

I've updated the configuration example in r10729.

#4 - 2012-10-27 10:55 - Daniel Felix

Thank you!

Just tested it!
