Description

Hi there,

it seems, that this "Back"-Link is hardcoded. I can't find it in the whole translation?

But I can't find it in the sourcefiles. Maybe you have a better idea where I can find it.

button_back would be a better translation label for this.

- File hardcodedBack.png added

I'm using git as sourcecode repository.
If this repository hasn't any commit in it, an error message will be generated.

The URL, where this error message would appear is something like: http://www.redmine.org/projects/redmine/repository

Beneath this error message there is a "Back".
