

Redmine - Defect #12253

config.plugins setting does not works

2012-10-29 23:03 - Dan K

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Plugin API	Estimated time:	0.00 hour
Target version:		Affected version:	2.0.3
Resolution:	Invalid		
Description I tried to set plugins load order via config.plugins = [:plugin_name_b, :plugin_name_a] in application.rb (how it pointed inside at comments), also i've tried to do this in additional_enviroment.rb Load order does not works :(config.plugins = %w(plugin_name_b plugin_name_a) not works too plugin_name_a always loads first than name_b Despite of only one plugin pointed via directive, all of the plugins in redmine/plugins loads. Seems like config.plugins option does not works. Environment: Redmine version 2.0.3.stable.9901 Ruby version 1.9.3 (i686-linux) Rails version 3.2.6			

History

#1 - 2012-10-30 08:25 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

config.plugins option is a Rails thing, it is not supposed to work for Redmine plugins.
