

Redmine - Feature #12258

LDAP should be able to fill custom fields

Description			
<p>Hi there,</p> <p>I encountered a little feature request.</p> <p>For example if I define some custom fields for my users, it would be great to assign them with the ldap-plugin.</p> <p>Those custom fields could be filled with additional ldap informations. For example: Manager, Telephone-Number etc.</p> <p>Best regards, Daniel</p>

This would be very useful.

#2 - 2015-05-18 06:46 - Toshi MARUYAMA

- Category set to LDAP

#3 - 2016-11-03 08:29 - Dmitry Shumilin

I need it too. Thanks.

Still, this feature is interesting for quite some people, including me. Is there any chance to have it appear in the roadmap...?
Obviously, this issue is related to [#1697](#).
