**Description**

Testing in parallel trac, I noted an interesting feature of trac being the possibility from the wiki pages to define macros displaying the results of specific sql query. Would it be possible to have such a feature, since it allows to present the content of the issues tracker with text around, which can be useful to edit reports to high management.

**History**

#1 - 2008-05-13 09:49 - john smith
- % Done changed from 0 to 40

nice

#2 - 2008-06-27 14:37 - Philippe Lafoucrière

Trac has some wonderful macros to include tickets (something like roadmap=0.1&status=closed). It would be (very) nice & useful to have a similar approach in redmine. I guess it's the only feature where trac is doing more than redmine.

Thx

(ps : +1 !)

Does #1700 works for you? I haven't tried it yet, probably tomorrow if I have time. Adding new macros seem to be pretty easy.

- Target version set to Candidate for next major release

#6 - 2011-05-19 09:55 - pasquale [:dedalus]
+1

#7 - 2011-05-20 10:37 - Daniel Feliciano Branco
Does this plugin solves the issue?

Looks like the {{ref_issues}} macro does.

#10 - 2012-10-25 10:33 - Anonymous
Now it's Wiki List plugin

#11 - 2015-02-12 21:16 - T T

Did anybody test http://www.r-labs.org/projects/wiki_lists/wiki/Wiki_Lists_en plugin in the latest version of REDMINE?
