Category:	Email notifications		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Fixed		**Affected version:**	

Description
If we are using "h1" or "h2" formatting things in description of a ticket, there is "¶" char in email notification near the titles: http://screencast.com/t/snGPqzkWv

Can not reproduce...?
Maybe it's caused by some special redmine ver. or email client?
I tried on the redmine platform in my company(ver 1.3.x, I think.) and the email format seems right in my MS outlook 2010. No strange char found...
See attached screenshot.

- Status changed from New to Confirmed

The styles that are embedded in the email hide the ¶ but they are present indeed. So you can see them if you disable styles.

#3 - 2012-11-05 15:36 - Anton Nepomnyaschih

I use gmail.

This issue should be fixed by #8335. Redmine uses inline style instead of 'style' tag in the HTML header since 3.2.0, so the defined styles are applied even with Gmail.
