

Redmine - Feature #12273

Define project/projects in a categorie

Description			
I think it is wrong to see categories that have nothing to do with my project.			

History

#1 - 2012-10-31 17:18 - Daniel Felix

- Category set to Issues
- Status changed from New to Closed

Well you normally should see just those categories which are defined in your project configuration?

Which version of Redmine do you use? Maybe you need some update?

In 2.1.2-devel, this is implemented as requested.

Example:

- ProjectA
 - CategoryA
 - CategoryB
- ProjectB
 - CategoryC
 - CategoryD

You just can see categories A and B in ProjectA and categories C and D in ProjectB.

If you mean something different, please reply on this Ticket. For now, i would say this is already implemented.

#2 - 2019-10-07 15:25 - Jérôme BATAILLE

I think this issue can be closed. Categories inheritance is discussed in other issues.
