

Redmine - Defect #12300

default admin password is incorrect

2012-11-04 02:16 - Jarrett Chisholm

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version:	Affected version: 2.0.3
Resolution: Invalid	

Description

In the Redmine Installation wiki (for 1.4+) available at <http://www.redmine.org/projects/redmine/wiki/RedmineInstall>, the default admin password is not correct.

After installation, attempting to log into redmine with user 'admin' and password 'admin' results in failure.

Workaround:

Run the follow query on the database (mysql specific - you may need to alter for another dbms):
update users set hashed_password ='fa2d1dc9a9d2982c3ef8cc3b5d985d1c54c9a064' where login='admin';

The hashed password fa2d1dc9a9d2982c3ef8cc3b5d985d1c54c9a064 is 'turnkey' in plain text.

I found this workaround here - <http://www.redmine.org/boards/2/topics/27775>.
