

Redmine - Feature #12361

Mixed done ratio calculation mode

2012-11-14 19:46 - Alatar Al

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:			

Description

Now "% Done" can be set manually, or calculated based on issue status but I can use only one of these ways. This would be good to:

1. allow to calculate "% Done" of parent project based on child projects "% Done" when use status-based calculation

2. add mixed mode, when "% Done" can be assigned manually, and set automaticly on update if (status\_changed and "% Done"\_not\_changed and "% Done" < "NewStatus%Done")

+1

If Status isn't assigned a %, calculate from the child fields
