# Redmine - Feature #12426

## There is shortage of team definition

**Description**

Hi,
There is no possibility to create a team (members with assigned roles). Each time when we define members of project we have to loose time for this configuration choosing from members and roles. The solution should:
- give possibility to define teams - Administration menu
- give possibility to add members of project from defined teams - Project->Members
- give possibility to define default team for projects - Administration menu->Settings->Project

**History**

**#1 - 2012-11-23 11:12 - Daniel Felix**

Hi Marek,

you can define groups in redmine and assign those groups roles per project.

This seems, as I understand your request, your needs. Doesn't it?

You can find it at Administration -> Groups

**#2 - 2012-11-23 11:48 - Marek Jabłoński**

Hi Daniel,
I know about it but it takes time bacause groups contains users without roles. Team should connect users with roles ie. contains members.

**#3 - 2012-11-23 16:22 - Daniel Felix**

Ah okay... i get the point.

This is the behaviour of Groups:

- Group A

    - MemgerA
    - MemgerB
    - MemgerC

Group A is assigned to Project A as "Developer".

This is the behaviour you would like to have:

- Group A

    - MemgerA (Role: Developer)
    - MemgerB (Role: Manager)
    - MemgerC (Role: Reporter)

Group A is assigned to Project A.

Is this correct?
