

Redmine - Defect #12480

Gantt to PNG not working. Thin freeze with Redmine. High CPU usage.

2012-11-30 20:47 - Anatolii Vorona

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Gantt	Estimated time:	0.00 hour
Target version:		Affected version:	2.1.4
Resolution:			

Description

```
# cat /etc/thin/redmine.yml

Duplicated by Redmine - Defect # 12732: Serveroverload after Gantt PNG export

Closed**History**

#1 - 2013-01-05 21:28 - Daniel Felix

The same thing happens on my machine, after some png export. If some patch is available, I could test this for you.

Running:

Ruby 1.8.x

Ubuntu 10.04 LTS

#2 - 2013-02-18 13:44 - Daniel Felix

The same on another machine.

CentOS 6.3

Ruby 1.8.7 - latest patchlevel

It uses all four CPU's.

Maybe there could be some Exportoptions, to disable Export to some special formats?

#3 - 2013-02-18 23:11 - Anatolii Vorona

possibly it's important.

this problem occurred on a vps **openvz**.

same server redmine 2.1(thin+nginx, from user redmine) on a **xen** vps works fine, without this bug.

#4 - 2013-02-18 23:18 - Jean-Philippe Lang

As a workaround, you can bundle Redmine without rmagick to disable the PNG export: bundle install --without rmagick. I think that this feature should be removed anyway.

#5 - 2013-02-19 11:45 - Daniel Felix

Well the export to PNG is good for meetings. But a PDF would be good enough too.
