

Redmine - Defect #12489

Elapsed time when updating issues fail

2012-12-03 10:14 - Damien SONCOURT

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.1.4
Resolution:	Cant reproduce		
Description			
<p>When you want to add elapsed time at the same time you update the properties of an issue, it's ok. but if on of the properties is not correct (Format number or other...), the elapsed time will be saved (and not the issue). So when you resolve the problem and you click on save, you update two times the elapsed time. Sorry for my English.</p>
