Redmine - Defect #12502

Links to projects I am not member of are not expanded

2012-12-04 16:20 - Alfred Costa

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**

Category:	Text formatting	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Wont fix	**Affected version:**	2.1.4

Description

When a link to another project is made using the project:identifier syntax, as described on the Wiki help syntax page, only members of the linked project see the expansion of the macro. Non-member users see the unexpanded syntax.

For instance, I am part of a "Main" project but not of its sub-projects. One of them is called "General Library" and its identifier is *gen-lib*.
One of my coworker in the "Main" project (who is also part of the *gen-lib* project) put a link to this project in the "Main" project wiki.

What he sees is:

    see project General Library

What I see is:

    see project project:gen-lib

I tried this today on the demo server.

History

#1 - 2021-06-10 15:17 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

Redmine converts a "project:identifier" string to a link only when the project is visible to the user.

Looking into the code source:tags/4.2.1/app/helpers/application_helper.rb#L1156, I believe this is not a defect, but the intended behavior. The name of an invisible project should not be displayed for security reasons.
