Description

Redmine provides a way to customize the format of dates and times on whole Redmine basis. That configuration option is found in Administration/Settings/Display/Date format and Time format.

One of the settings if user preference in which case the dates and times are formatted bases on the culture preference of the user. I would appreciate if there is an option to customize the formats on a user level. I am Hungarian and personally, I like to use all of my software in English but still use dates and times in Hungarian standard formatting (btw 2012. 12. 05, but I am very satisfied with Redmine standard date input formatting 2012-12-05).

My installation:

- Redmine 2.1.4
- Ruby: I think this is not applicable.
- Rails: I think this is not applicable.

History

#1 - 2012-12-05 10:57 - Zsolt Vilagos

I checked the version of some components:

```
Environment:
  Redmine version                     2.1.4.stable
  Ruby version                        1.8.7 (x86_64-linux)
  Rails version                       3.2.8
  Environment                         production
  Database adapter                    SQLite
Redmine plugins:
  redmine_default_version             0.0.2
  redmine_holidays                    0.0.2
  redmine_ics_export                  2.0.0.dev
  redmine_ldap_sync                   1.3.0
  redmine_work_time                   0.2.6
```

Some 9+ years later, this is still not something the **user** can choose for **his**/**her** preferences, which is where it belongs. Or did I not find the correct place on the **user profile** to change this?

The date/time format a user prefers has nothing to do with the selected language, locale, or other regional settings.

+1 for getting this into some future Redmine 4.x release :-)
