After I did a commit, the activity page was presented in the correct theme layout.

Maybe a caching bug?

Yeah, indeed an issue related to the caching of the activity page. Though, you shouldn't need to wait until a new activity event is added before the page is refreshed, instead you should be able to force a refresh by reloading the activity page using Ctrl-F5. At least this worked for me while testing this issue with Redmine 2.3.1-devel and Firefox 20.

#3 - 2019-05-07 04:31 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix
