Target version: 2.2.0	
Description	
Hello.	
This korean translation patch is for r10952 (in the 2.2-stable branch) and also for r10998 (current trunk). I wish this patch could be applied into the redmine 2.2.0 version, which is going to be released soon.	
The update consists of refining some awkward translations and introducing new translations:	
<ul style="list-style-type: none">- fix awkward translation for 'commit', 'tag', and 'branch' : <code>commit</code>, <code>tag</code>, <code>branch</code>- fix translation for 'duplicates' and 'duplicated by' : <code>duplicates</code>, <code>duplicated by</code>- fix translation for 'issue watchers' to '<code>issue watchers</code>'- some new translations on fields, workflow and archiving projects- other minor & trivial fixes	
Thank you.
